

Product Training/ Help Page Template

How to Write Help Pages for Verified Metrics

A guide for creating product documentation

Your Goal

Create help pages that answer one question: **"How do I do this thing and why does it matter?"**

Every help page should help a user complete a specific task—not just explain what buttons do.

The Process

Overview

1. **Record** — Product specialist demos the feature on video while marketing asks questions
 2. **Transcribe** — Get the transcript from the recording
 3. **Generate** — Use AI to draft the help page from the transcript
 4. **Refine** — Edit, add screenshots, and complete the checklist
 5. **Review** — Submit for manager approval
 6. **YouTube Video** — Create a polished video version for YouTube
-

Step 1: Record the Session

Setup:

- Screen recording with audio (Loom, Zoom, etc.)
- Product specialist shares screen and does the task
- Marketing asks questions throughout

Marketing's job during recording:

Your goal is to get a transcript rich enough for AI to write the help page. Don't let the specialist just click around silently.

Prompt them with...	To get...
"Who would typically be doing this?"	Who This Is For
"What do they need to have set up before starting?"	Prerequisites
"What data needs to exist in the system?"	Data requirements
"How long does this usually take?"	Time estimate
"What will they have when they're done?"	Output description
"Why are you clicking there? What does that do?"	Step-by-step detail
"What does that field/number mean?"	Output interpretation
"What if someone sees an error here?"	Common issues
"How do you know when you're done?"	Completion signal
"What would someone do next after this?"	What's Next

Recording tips:

Do	Don't
"Talk me through what you're clicking and why"	Let them silently click
"Pretend I've never seen this before"	Assume the viewer knows the product
"What would go wrong if I skipped this step?"	Rush through inputs
"What does a good result look like here?"	Skip output explanation
Pause and ask clarifying questions	Let jargon go unexplained

Minimum recording requirements:

✓	Must capture
☐	Full task from start to finish
☐	Every click explained out loud
☐	All prerequisites mentioned
☐	What the output means
☐	At least 2–3 "what could go wrong" moments
☐	How to know when you're done

Step 2: Generate with AI

What to give the AI:

1. The transcript
2. The help page template (below)
3. This prompt:

I have a transcript of a product walkthrough. Using the template below, create a help page draft.

Rules:

- Every step must start with a verb
- Keep steps to 3 sentences max
- Use exact button/field names from the transcript
- Include a "Common Issues" section based on any problems or warnings mentioned
- Flag anything that's unclear or missing with [NEEDS INFO]

Template:

[Paste the template]

Transcript:

[Paste the transcript]

After AI generates the draft:

✓	Check
☐	Replace any [NEEDS INFO] flags—ask the product specialist if needed
☐	Verify button/field names match the actual product
☐	Add screenshots from the recording
☐	Cut anything that feels like filler
☐	Run through the checklist below

Step 3: Add Screenshots

Pull screenshots from the video recording for:

- The "At a Glance" area if there's a key starting screen
- Any step where the UI is dense or confusing
- Color coding or visual conventions
- Key outputs (charts, tables, results)

Keep screenshots:

- Cropped to the relevant area
- Annotated with arrows or highlights if needed
- Named descriptively (not "Screenshot 2024-01-15")

Step 4: Create the YouTube Video

Once your help page is complete and approved, create a polished video version for YouTube.

Pre-Production:

Task	Details
Script	Use the help page steps as your outline
Screen setup	Close unnecessary tabs, hide bookmarks bar, use clean demo data
Resolution	Record at 1080p minimum (1920×1080)

Voice Requirements:

- British woman's voice
- AI-generated is acceptable

Video Structure:

Section	Length	Content
Hook	5–10 sec	"In this video, you'll learn how to [task] in Verified Metrics"
Context	15–30 sec	Who this is for and what they'll get
Walkthrough	2–5 min	Follow the help page steps exactly
Recap	10–15 sec	"You've now [completed task]. Next, you might want to..."
CTA	5 sec	Subscribe, link to help page, related videos

YouTube Optimization:

Element	Best Practice
Title	Start with the task: "How to [Task] in Verified Metrics"
Thumbnail	Branded template + readable text + UI screenshot
Description	First 2 lines = what they'll learn. Include timestamps, link to help page
Tags	Feature name, task name, "Verified Metrics tutorial," related terms
Chapters	Add timestamps for each major step
Cards/End screens	Link to related tutorials and subscribe prompt

Description Template:

Learn how to [task] in Verified Metrics step by step.

 Full written guide: [help page URL]

 Chapters:

0:00 - Introduction

0:15 - What you'll need

0:45 - Step 1: [Action]

1:30 - Step 2: [Action]
[etc.]

Related videos:

- [Related tutorial 2]

Questions? [support link]

#VerifiedMetrics #Tutorial #[FeatureName]

Video Checklist:

✓	Check
☐	All UI text is readable
☐	Intro and outro use brand templates
☐	Video matches the written help page steps
☐	Timestamps/chapters added
☐	Thumbnail follows brand template
☐	Description includes help page link
☐	End screen with subscribe + related video

Target Specs:

Spec	Target
Length	2–5 minutes (shorter is better)
Resolution	1080p or higher
Aspect ratio	16:9

The Template

[Feature / Task Name]

> [One sentence: what this does and what you'll get]

At a Glance

| | |

|:--|:--|

| ****Who This Is For**** | [User type + context] |

| ****What You'll Need**** | [Prerequisites + data required] |

| ****Time**** | [Estimate] |

| ****What You'll Get**** | [Output] |

Video Walkthrough

> ****[Title]**** ([X] min) — [Embedded video]

>

> *Prefer to read? Steps below include screenshots.*

Steps

1. [Action]

[What to do and why, in 2–3 sentences max]

[Screenshot if helpful]

2. [Action]

[What to do]

[Screenshot if helpful]

3. [Action]

Quality Checklist

Complete all items before submitting for review.

Content

✓	Check
☐	All template sections filled in—no blanks or placeholders
☐	"At a Glance" table is complete and specific
☐	Every step starts with a verb and is 3 sentences or less
☐	Output section explains what the user will see and what "good" looks like
☐	At least 3 common issues with solutions
☐	"Done when" tells the user exactly how to know they succeeded
☐	Is there a video explanation of this process?

Accuracy

✓	Check
☐	I completed the task myself using only this guide
☐	Button names and labels match the actual product
☐	Screenshots match the current UI
☐	Time estimate is based on actually doing it

Clarity

✓	Check
☐	A new user could complete this with no prior knowledge

✓	Check
☐	No jargon without explanation
☐	No typos or formatting errors
☐	Screenshots added where the UI is dense or visual

Before You Submit

Question	Yes/No
Could someone new complete this using only this page?	
Is there anything I'm hoping the reviewer won't notice?	

Handoff

Include with your submission:

1. Link to draft
2. This checklist (completed)
3. Any questions or decisions you want feedback on

Success Metrics

How do we know if a help page is working?

Leading Indicators (check weekly/monthly)

Metric	What It Tells You	Target
Page views	Is anyone finding this?	Trending up or stable
Time on page	Are people reading it?	2–5 min (depends on complexity)
Video play rate	Is the video useful?	>30% of visitors
"Was this helpful?" rating	Direct feedback	>80% positive
Search queries leading here	Are we matching user intent?	Terms should match the task

Lagging Indicators (check quarterly)

Metric	What It Tells You	Target
Support tickets for this feature	Is the page reducing questions?	Decreasing over time
Repeat visits to same page	Are users stuck or confused?	Low repeat rate
Feature adoption	Are more users completing this task?	Increasing over time
Time to complete task (if measurable)	Is the guide efficient?	Decreasing over time

Qualitative Signals

Signal	What It Means
Support says "the docs answered it"	Page is working
Users quote the help page in tickets	They're finding and reading it
New hires can complete tasks from docs alone	Onboarding quality
Product specialist stops getting the same questions	Knowledge transfer succeeded

Red Flags

Signal	What to Do		
High page views but still lots of support tickets	Page isn't answering the real question—revise		
Low "helpful" ratings	Review feedback, interview users, rewrite		
Users abandon partway through	Steps may be unclear or missing—test yourself		
Nobody visiting the page	Discovery problem—check search, linking, navigation		

Questions?

If you're unsure, ask yourself:

1. "Would I be able to complete this task using only this page?"
2. "What would confuse me if I were brand new?"

When in doubt, try the steps yourself and note where you get stuck.
